Muhammad Zaryab Khan

Software Quality Assurance · Software Development

Istanbul, Turkey · +90 507 446 7087 · zaryabkhan864@gmail.com · linkedin.com/in/khanzaryab

PROFILE

Computer Engineering graduate (MSc) with hands-on experience validating back-end applications: reviewing specifications, designing and executing functional and regression test cases with traceability to requirements, and managing defects from report through investigation to verified fix. Background in software development with Node.js and REST APIs. Collaborative, quality-focused and eager to grow in test automation and CI/CD within a multinational team.

SKILLS

- **Testing:** test planning, test case design and execution (functional and non-functional), regression testing, user acceptance testing, requirements traceability, exit criteria
- **Defect management:** defect reporting, investigation, root-cause analysis and fix verification; test progress reporting to stakeholders
- **Back-end validation:** REST API testing with Postman, SQL data validation (Oracle, MySQL), MongoDB
- **Programming:** JavaScript, TypeScript, Python, Java, Node.js, PL/SQL
- **Tools and methods:** Jira, Confluence, Postman, Git, GitHub, Bitbucket, Agile (Scrum, Kanban); learning test automation and CI/CD

EXPERIENCE

IT Support Engineer and IT Teacher

Gokkusagi International School, Istanbul · January 2023 – Present

- Diagnose and resolve technical issues across PCs, smart boards, printers, servers and the school network.
- Support system upgrades and security measures to keep services reliable for all departments.

Freelance Software Developer (part-time)

Remote · January 2023 – Present

- Build and test web applications for clients with Node.js, Express, MongoDB and React.js; test REST APIs with Postman before delivery.
- Agree requirements and acceptance criteria with clients and verify features against them.

Software Engineer

Digiteaz, Karachi · December 2021 – July 2022

- Fixed bugs across platform features and refactored React components, improving reliability.
- Built Node.js back-end features, including Stripe payment integration and SMTP email; documented feature workflows in Confluence.

Service Desk Officer (ERP Business Analysis and UAT)

Tabba Heart Institute, Karachi · September 2017 – December 2020

- Reviewed specifications for new modules of HOPE, the Oracle-based hospital ERP licensed from Shaukat Khanum Memorial Cancer Hospital, flagging gaps and risks before release.
- Designed and executed user acceptance test cases traced to requirements, and confirmed modules were ready before rollout.
- Reproduced and investigated user-reported defects, logged them as structured tickets for the vendor development team and verified the fixes.
- Validated back-end data integrity and traced reporting errors with SQL queries on Oracle databases.
- Reported issues and testing progress to IT and hospital management, and trained end users on new modules.

PROJECTS

- **Smart School System** (Node.js, Express.js, MongoDB, React.js): role-based school management platform with finance and reporting modules; REST APIs tested with Postman.
- **Early Heart Attack Prediction Application** (IoT, Arduino, AI model): research published in an international journal (ISSN 1673-064X).

EDUCATION

- **MSc in Computer Engineering** (Master of Information Technologies, thesis-based), Altınbaş University, Istanbul · 2020 – 2023 · GPA 3.57
- **BSc in Computer Science**, Hamdard University, Karachi · 2013 – 2018

CERTIFICATIONS AND LANGUAGES

- Managing Big Data with MySQL, Duke University · Programming for Everybody (Python), University of Michigan
- English: professional working proficiency
